

FOR IMMEDIATE RELEASE

July 1, 2012

ATCO Software Inc. is proud to announce their inclusion in the Sheraton Maui app created by Runtriz of Los Angeles. According to the press release, “The app allows guests limitless access to the resort amenities while on the property or on the go”.

For the last five years, the Sheraton Maui has been part of the Starwood Central Dining platform that uses the ATCOREz software. The Black Rock Steak & Seafood Restaurant as well as the Teppan-Yaki Dan Restaurant are booked using ATCOREz over the phone and through the resort website.

When Runtriz was selected to create the app for Sheraton Maui, ATCO was asked to work with Runtriz to allow them to utilize ATCO’s proprietary web service to allow real-time real inventory dining reservations.

Here is the new Sheraton Maui app:
