FOR IMMEDIATE RELEASE

March 3, 2008

ATCO Software announces the addition of Kiosks as another way for clients to receive Real-Time real inventory reservations.

ATCO Software Inc., the leader in Real-Time bookings for the Attractions Industry, announced today the launch of the first touch screen Kiosk for its client Top of Waikiki Restaurant. Top of Waikiki uses the ATCOREz software to handle its restaurant reservations. Top of Waikiki receives Real-Time bookings from its website directly into the ATCOREz Software.

The Kiosk for the restaurant is located at the entrance to the Waikiki Business Plaza on Kalakaua Ave. Customers can search for availability on the touch screen. When they find the day they want, the ATCO Web Service displays the times available that can handle the number requested. The client chooses the time they want and then enters their name and phone number. The booking is then completed, the customer receives a confirmation number from the ATCOREz Software and the restaurant Dining Manifest now includes the customer name.

Top of Waikiki contracted Pacific Digital Signs to provide the Kiosk and the flat screen display that is over the touch screen. The restaurant can display their food and ocean views on the screen. Pacific Digital also wrote the program to display the restaurant menu on the touch screen. The Kiosk is the first of its kind in Hawaii.
