ATCO Announces The First Hawaii Activity Provider To Receive Real-Time Bookings From Two Sources – First Is Their Website And Second Is An Activity Desk Utilizing The ATCO Voucher Program.

ATCO Software Inc., the leader in Real-Time bookings for the Attractions Industry, announced today that Holoholo Charters on Kauai is now receiving real-time bookings from their company website utilizing the ATCO Web Service as well as receiving real-time bookings from the activity desk at Bubba Burgers (an ATCO client) through the ATCO API.

Activity Providers have been looking for a faster way to get website bookings into their company reservation system. Most Activity Providers receive email from their website. Entering this email into their main reservation system is very time consuming. The new ATCO Web Service saves time with each booking that goes directly into the main reservation system from the company website.

Real-Time bookings from activity desks that utilize the ATCO Voucher software comes in handy when the phone lines are busy and the clients at the Activity Desk must wait. Now, Activity desks that use the ATCO voucher Software can book in real-time to any Activity Provider that uses the ATCOREz Software.
