

FOR IMMEDIATE RELEASE

November 1, 2011

ATCO Software Inc. announces the addition of Mobile Booking from QR Codes to its list of ways customers can make real-time real inventory reservations into its ATCOREz platform for Attraction Providers and Restaurants.

ATCO Software Inc., Hawaii's leader in developing software for the Attractions Industry and Restaurants, today unveiled a mobile booking site for its customer Starwood Hotels Waikiki.

Customer's get to the new mobile booking site from QR codes in the Waikiki Menus Magazine. Waikiki Menus has the new QR codes on advertisements for the Beachhouse Restaurant at the Westin Moana Surfrider Hotel, the Azure Restaurant at the Royal Hawaiian Hotel, and the Kai Market Restaurant at the Sheraton Waikiki.

The new mobile site books directly into Starwood Waikiki's ATCOREz Central Dining software. Starwood's Central Dining platform is currently using ATCO's proprietary shopping carts to receive reservations from Starwood hotel websites in English and Japanese as well as to receive reservations from the Concierge Desks at the Waikiki hotels that utilize the ATCO Voucher platform.

Here is the new QR code:
